Our Ref: - CAA_2010_W0110

Attention: Belinda Mills

Wind Farm application received in 05 March 2019 for the Environmental Impact Assessment process on the construction of the Proposed Development near Murraysburg known as Ishwati Wind Farm.

This correspondence supersedes the correspondence dated 7 April 2014 with same reference number

The SACAA recognizes the national need for renewable energy resources and as such is supportive of the development of any such projects within its mandate to ensure aviation safety in South Africa.

In light of this, a provisional assessment of your proposal has been conducted in relation to the terms and provisions as contained in the Civil Aviation Regulations (CAR), for the controlling and/or restricting of structures which will constitute an obstruction or potential hazard to aircraft moving in the navigable air space in the vicinity of aerodromes, along promulgated air routes and airspaces, or to aviation communication/navigation/surveillance systems, or which will adversely affect the performance of the said aviation infrastructure or systems.

The Civil Aviation Authority therefore in principle has **no objections** to the development of the proposed project, including the proposed transmission line routing, the pylons of which will be restricted to 30m in height.

A **conditional approval** will be granted **subject** to the submission of the **final (planned) turbine layout and height**, which will be subjected to an in-depth assessment turbine layout in accordance with Civil Aviation Technical Standards, (CATS) 139.01.30. The SACAA will provide a **final approval** on receipt of **details on "as built"**.

Please note: that the conditional approval will be valid for a period of 5 years from the date of issue.

The CAA letter of no objection does not substitute or replace any other approvals, which may be required by the applicant.

Yours Truly,

SOUTH AFRICAN

CIVIL AVIATION
