RE: CONSENT USE OF LAND ON PORTION 2 OF THE FARM WITTEKLIP NO 32

Dear Sir,

I herewith formally apply for the temporary consent use of 4.73 ha of agricultural land on Portion 2 of the farm Witteklip No 32, in the Murraysburg district. (Sheep farming)

I am well progressed in the process of applying for a temporary mining permit from the Department of Mineral Resources to develop a rock quarry on the above-mentioned property. The period for the consent use is five years, in line with the validity of the mining permit.

The reason for the application is to establish a temporary rock quarry for the supply of concrete aggregate for the construction of the proposed Khangela and Umsinde Wind Farms. All indications are that the construction of these wind farms will commence during the fourth quarter of 2022.

The benefits for this application are as follows:

1. There are no commercial quarries in the vicinity which could supply high quality aggregate. The nearest quarry is 142 km away at De Aar.
2. An on-site quarry will have a huge cost and time benefit to the construction of the wind farms.
3. It will have a huge environmental benefit not having to transport approximately 90 000 tons of aggregate by road from De Aar.
4. The on-site quarry will also ensure higher numbers of local labour employment.

I trust this application will meet your requirements

Yours faithfully,
BBT Contractor's Consultant
